Istanbul, Turkey | Europe/Istanbul

SUMMARY

Hands-on software architect with 14+ years across banking, payments, enterprise financial software and government identity systems. Builds .NET/Java backends for digital banking, CRM and collections; modernises COBOL/mainframe systems and EOD/batch workloads.

TECHNICAL SKILLS

Banking and Modernisation: Payment systems, COBOL/mainframe modernisation, End-of-Day (EOD), Batch processing, Job dependencies, Workload orchestration

Backend Engineering: C#, .NET, .NET Core, ASP.NET MVC, REST APIs, EF Core, Asynchronous programming, WCF

Architecture and Design: Clean Architecture, Domain-Driven Design (DDD), Distributed systems, Service-oriented architecture, Repository, Unit of Work, Facade, Strategy

Data and Integration: Oracle, SQL Server (MSSQL), PL/SQL, IBM MQ, RabbitMQ

Enterprise AI Engineering: GitHub Copilot Enterprise, AI-assisted SDLC, Agentic development, Spec-Driven Development (SDD), Developer enablement, Architecture enablement

Delivery and Platforms: Azure DevOps, GitHub Actions, CI/CD, Docker, Kubernetes

Technical Leadership and Quality: Architecture guidance, Code reviews, Mentoring, Coding standards, Unit testing, Playwright E2E testing

Languages and Frameworks: Java 21, Spring, TypeScript, JavaScript, WPF, WinForms, Knockout.js

Training: Microservices, .NET with AWS, React

PROFESSIONAL EXPERIENCE

Software Architect | Innovance

January 2026 – Present | Istanbul, Turkey (Remote)

Previously: Senior Software Engineer (Backend, .NET) | May 2024 – December 2025

- Modernise Akbank COBOL/mainframe banking and payment systems into .NET and Java backends, with hands-on implementation primarily in Java 21; analyse legacy business rules and shape backend architecture.
- Work on mission-critical EOD and batch modernisation, analysing job dependencies and workload orchestration for scheduled banking processes.
- Designed and developed an enterprise GitHub Copilot plugin for the Architecture organisation, packaging reusable guidance, agent/sub-agent workflows and engineering standards.
- Built repository- and database-oriented Copilot workflows and reusable engineering knowledge to support AI-assisted SDLC and spec-driven development across teams.
- Developed internet and mobile banking services for Türkiye Finans, implementing ASP.NET MVC/WCF backends with SQL Server and unit tests.

Senior Software Engineer (Backend, .NET) | insightsoftware

September 2022 – April 2024 | North Carolina, USA (Remote)

- Implemented C#/.NET Core backend features for enterprise financial software within an international remote engineering team.
- Contributed to backend architecture and feature design, connecting technical decisions with hands-on implementation.

Senior Software Engineer (Backend, .NET) | OBSS

September 2017 – September 2022 | Istanbul, Turkey

- Led Halkbank mobile banking backend migration to .NET Core and Clean Architecture, restructuring the legacy .NET Framework implementation.
- Applied asynchronous programming and thread optimisation to banking request handling; built REST APIs with EF Core and SQL Server.
- Used Repository/Unit of Work patterns and Azure DevOps CI/CD pipelines for backend delivery.
- Owned code reviews and mentored Türkiye Finans developers, defining coding standards for WinForms/WCF customer applications.
- Led Akbank payment campaign development with C#, Java/Spring, TypeScript, Knockout.js and Oracle 12c.

Java Developer | TÜBİTAK

January 2017 – September 2017 | Kocaeli, Turkey

- Implemented Java passport personalisation software, writing EAC/SAC security data to smartcard chips through APDU commands for government identity systems.

.NET Developer | VakıfBank

August 2013 – January 2017 | Istanbul, Turkey

- Reworked VakıfBank CRM and collections applications towards service-oriented architecture, using WPF/MVVM, WCF and Oracle 11g/PL/SQL.

Part-Time .NET Developer | VeriPark

December 2012 – June 2013 | Izmir, Turkey

- Developed ASP.NET widgets for Turkcell's SharePoint environment, contributing to portal functionality while completing the Computer Engineering degree.

EDUCATION

BSc in Computer Engineering

Ege University, Izmir, Turkey | September 2008 – June 2013

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate

Microsoft | Certification | March 6, 2026 | Expires March 6, 2027 | Certification overview (AI-102)

Introduction to GitHub Copilot

Microsoft Learn | Training | 2024 | Course overview

Build Microservices with .NET and Amazon Web Services

Udemy | Training | February 2024

IELTS - Band 7

British Council | Language test | 2023

React Nanodegree Program

Udacity | Training | February 2020

LANGUAGES

Turkish: Native; English: Professional proficiency; IELTS Band 7 (2023)

INTERESTS

Chess; LLM and RAG applications; AI-powered customer service; Travel and cultural exchange
